

BRINGING BROADBAND TO RURAL HAMPSHIRE

If you live in a rural area and have slow broadband, you may be eligible for up to £3000 per property towards the cost of installing a gigabit-capable connection*.

Find out if you can benefit from the Hampshire Top-Up to the Gigabit Broadband Voucher Scheme:

- 1** Check you live in an eligible area by going to www.hampshiresuperfastbroadband.com/top-up and entering your postcode.
- 2** You need to apply as a group. Join up with other nearby residents (at least you and one other neighbour) and nominate a community lead.
- 3** Find a registered supplier in your area by going to the government's Gigabit Broadband Voucher Scheme webpage <https://gigabitvoucher.culture.gov.uk/for-residents/suppliers/>
- 4** The supplier will provide you with a quote, make the application for the vouchers on your behalf and guide you through the process.
- 5** Once your voucher application has been received the Gigabit Broadband Voucher Scheme team will email you to make sure you want to go ahead. If your project costs more than £3000 per property you will have to pay the remaining money if you choose to continue.
- 6** Your supplier gets to work to build the new broadband network for your community.
- 7** Choose an internet service provider once the network has been built, and purchase a superfast package to get connected.
